## SKILLS

---

### Front end development

HTML | CSS | JS | React | Next js | Typescript | Redux | Github | Firebase | SCSS | Tailwind | Easypeasy

## PROJECTS

---

### Goldenursh

*Technologies: React | easypeasy | SCSS | Firebase*

**Demo** 🔗 | **Github** 🔗

An e-commerce platform for ordering and purchasing food delicacies.

- Collaborated with a web designer to conceptualize and execute this project using React.js and Firebase.
- Integrated Flutterwave for secure online payments and added live chat for enhanced customer support.
- Developed an intuitive admin dashboard for streamlined site and staff management.

### Space Tourism

*Technologies: React | SCSS*

**Demo** 🔗 | **Github** 🔗

- Developed a fully responsive website dedicated to space exploration utilizing React for the frontend architecture and SCSS for styling.

### Foodieland

*Technologies: Next js | Typescript | tailwind*

**Demo** 🔗 | **Github** 🔗

A website offering a diverse selection of foods and their recipes.

- Utilized TypeScript for precise type casting and data handling within the project.
- Applied Tailwind CSS to style the application and ensure responsive design across all devices.

## EDUCATION

---

### Mechanical Engineering

2023

*Federal University of Agriculture, Abeokuta (FUNAAB)* 🔗

Ogun State

- CGPA: 4.0/5.0

## EXPERIENCE

---

### Engineering Intern

04/2022 – 10/2022

*Domitech Engineering Services Limited* 🔗

- Supported pipeline fabrication and installation processes for generator sets, ensuring optimal fluid flow within the system.
- Assisted in the Structural Steel Erection and Installation, contributing to the seamless assembly of vital structures.
